REPORT / SUMMARY DECISION SHEET

PURPOSE: COMMISSIONER DECISION – REF. DLI 053

Timing: Routine

Title: Donation for research into community tensions in Wales

Category of Decision / Business Area Impact:

Finance

Executive Summary:

Commissioner agreed to a donation of £1000 towards Prof Matt Williams from the ESRC Social Data Science Lab to collaborate with other police forces across Wales to gather intelligence to inform more accurate and usable community tension assessments.

Recommendation:

This decision relates to a £1000 donation for research to inform more accurate and usable community tension assessments. It seeks to identify a consistent way to measure and report on community tensions using a variety of sources, including linking into WG to inform their policy decisions. The research supports the strategy detailed in my Police and Crime Plan and will consider an array of intelligence across the four police forces in Wales, including crime statistics, community reports from wardens, demands for housing, and political extremism. It will aim to evaluate the utility of social media communications for tension and cohesion monitoring, and evaluate the role of positive social media narratives in curtailing spikes in negative narratives in the aftermath of an event. Partnership working is fundamental to delivering a joined-up approach to tackling the challenges that face all public services in Wales. All four police forces in Wales have pledged to support the project and have each donated £1000.
